DETAILED ACTION

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 14 is rejected under 35 U.S.C. 102(e) as being anticipated by

Farmer et al.

Farmer et al disclose a system for amplification of WDM signals (column 1, line 64) in the C, L, S and XL bands (column 2, lines 5-15) comprising: a radio frequency modulated pump source (figure 3) and a transmission fiber (figure 2) for receiving communication signals and the RF modulated pump signal. The Rf modulated pump source further comprises: an optical source (30) for generating a cw optical signal; a signal generator (32) for generating an RF signal having unspecified frequency and modulation depth; and a modulator (31) responsive to the optical source and the signal generator. This structure reads on claim 14.

Claim 15 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 15 provides language that supports Applicant's arguments filed 6/10/2004.

Claims 1-13 are allowed.

Lines 5-7 of independent claim 1 provide language that supports Applicant's arguments filed 6/10/2004.
